

ABHISHEK CHOUDHARY

Data Scientist

✉ abhic9666@gmail.com ☎ 8890319524 📍 Jaipur, Rajasthan  LinkedIn  Github  Portfolio

Profile Summary

Data Scientist with hands-on experience across Machine Learning, Deep Learning, NLP, and Generative AI (LLMs, RAG, chatbots). Skilled in Python, SQL, and Power BI, with a track record of building end-to-end data products — from exploratory analysis and model development to deployment. Focused on turning data into actionable business insight.

Experience

Data Analyst, Noya 06/2026 – 09/2026 | Jaipur

- Performed data analysis, data cleaning, and KPI tracking using Advanced Excel and Power BI to support data-driven decision-making.
- Delivered regular reporting and business insights, partnering with stakeholders to translate raw data into clear recommendations.

Data Science & AI Intern, RNS IT Solutions & Vaani AI 02/2025 – 05/2026 | Jaipur

- Worked across Data Science, Machine Learning, Deep Learning, and Generative AI projects, including LLM-based applications, chatbots, and RAG systems built with Python, SQL, NLP, and Transformers.
- Built data-driven solutions, predictive models, and EDA workflows; developed Power BI dashboards in collaboration with technical teams to support real-world business use cases.

Education

Data Science Trainee, TIPSG, RNS Group of Companies 2024 – 2026

Bachelor of Computer Applications, Manipal University Jaipur 2023 – 2026

Master of Computer Applications, Manipal University Jaipur

12th Standard, Shiv Shakti School, Jaipur

Core Skills

Programming & Data

Python, SQL, Regular Expressions, NumPy, Pandas, Statistics, Probability

Machine Learning & AI

Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG, Transformers, Scikit-Learn, Hugging Face, Prompt Engineering

Visualization & Reporting

Power BI, Data Visualization, Excel, Google Sheets

Tools

Git/GitHub, Web Scraping

Projects

Laptop Price Prediction & Recommendation System

Designed an end-to-end laptop price prediction model using Python and machine learning, covering data analysis, feature engineering, and deployment for real-time user interaction.

News Detection RAG Chatbot

Built a real-time news detection RAG system using Python, LangChain, and LLMs to retrieve live news data and generate context-aware responses to user queries.

Multimodal AI Chatbot (Kimi Model)

Built a multimodal AI chatbot integrating Python, Computer Vision, NLP, and LLMs for context-aware text and image interactions.

Stock Market Forecasting

Built an AI-powered stock market forecasting application using LSTM, TensorFlow, and time-series analysis with feature engineering, deployed via Streamlit.

Face Attendance System

Developed a real-time face recognition attendance system using Python and OpenCV, automating attendance with date/time tracking and voice-based authentication alerts.

Movie Recommendation System

Developed a movie data analysis web application using Python and Pandas, handling data cleaning, parsing/encoding errors, and groupby/aggregation techniques to generate insights.

Certifications

- IBM — Machine Learning
- IBM — Generative AI and LLMs: Architecture and Data Preparation
- Google — Data Analytics
- HackerRank — SQL (Basic, Intermediate, Advanced)
- IBM — Artificial Intelligence
- IBM — Introduction to Deep Learning & Neural Networks with Keras
- British Airways — Data Science
- IBM — Generative AI: Prompt Engineering Basics
- Deloitte — Data Analytics
- HackerRank — Python (Basic)
